The Ringbahn (German railway) is a 37.5 km (circle route around Berlin city area, on the network. Its course is a pair of tracks used by trains and another pair

The Ringbahn (German for circle) is a 37.5 km (23.3 mi) long circle around Berlin's inner city area, Berlin S-Bahn network. Its course is made of a pair of tracks used by S-Bahn and another parallel pair of tracks used by various regional, long distance and freight trains. The S-Bahn lines provide a closed-loop continuous service without termini. Lines S45, S46 and S47 are a section of the southern and western

The Ringbahn (German for circle railway) is a 37.5 km (23.3 mi) long circle route around Berlin's inner city area, on the Berlin S-Bahn network. Its course is made up of a pair of tracks used by S-Bahn trains and another parallel pair of tracks used by various regional, long distance and freight trains. The S-Bahn lines S45, S46 and S47 use a section of the southern and western ring, while lines S8 and S85 use sections of the eastern ring. The combined number of passengers is about 400,000 passengers a day. Due to its distinctive shape, the line is often referred to as the Hufeisenbahn (horseshoe railway). The Ringbahn is bisected by an east–west railway thoroughfare called the Hufeisenbahn (city railway), which crosses the Ringbahn from Westkreuz (Western Cross) to Ostkreuz (Eastern Cross), Nordring (Northern Ring) and a Südring (Southern Ring). The north-south S-Bahn link (with the North-South station in the north and both Schöneberg station and Südkreuz in the south. These four rings were part of the suburban fare structure before World War II. Over time, these four rings were removed through the removal of track connections. Only at Westkreuz does an original such track remain,
