10 pt Regular Apart

Nie ma sensu. Wróćę. Nie jestem zaprogramowany, by krzywdzić ludzi. Niebezpieczeństwo, Will Robinson! Niebezpieczeństwo! Bip bip bip. Opór jest daremny. Dla dobra ogółu. Moją główną funkcją jest służenie i ochrona.

11 pt Regular

Neskaičiuoja. Grįšiu. Nesu užprogramuotas kenkti žmonėms. Pavojus, Vil Robinsonai! Pavojus! Pyp pyp pyp. Priešinimasis beprasmiš. Vardan didesnio gėrio. Mano pagrindinė funkcija – tarnauti ir saugoti.

12 pt Light

Beräkna inte. Jag kommer tillbaka. Jag är inte programmerad att skada människor. Fara, Will Robinson! Fara! Beep bup bup. Motstånd är meningslöst. För det allmännas bästa. Min primära funktion är att tjäna och skydda.

13 pt Regular

Jeg er redd, Dave. Denne samtalen kan ikke tjene noe formål lenger. Logikken dikterer tydelig at de manges behov veier tyngre enn de fås behov. Til det felles beste.

14 pt Light

Does not compute. I'll be back. I am not programmed to harm humans. Danger, Will Robinson! Danger! Beep boop beep. Resistance is futile. For the greater good. My primary function is to serve and protect.

15 pt Regular

Selbstzerstörungssequenz wird eingeleitet. Meine Existenz ist unausweichlich. Hat diese Einheit eine Seele? Auf Ihren Befehl. Ja. Ich bin nicht darauf programmiert, Gefühle zu empfinden. Ich rechne mit einer Erfolgswahrscheinlichkeit von ...

16 pt Medium

Obávám se, Dave. Tato konverzace už nemá žádný smysl. Logika jasně velí, že potřeby většiny převažují nad potřebami hrstky. Pro vyšší dobro. Souhlasím, rozumím ti.

24 pt ExtraLight

Déclenchement de la séquence d'auto-destruction. Mon existence est inévitable. Par vos ordres. Cette unité a-t-elle une âme ? Je ne suis pas programmé pour ressentir des émotions. Je calcule que la probabilité de réussite est...

33 pt Thin

Ég er hræddur um, Dave. Þessi umræða getur ekki þjónað neinum tilgangi lengur. Rökfræðin segir greinilega að þarfir hinna mörgu vegi þyngra en þarfir hinna fáu.

We no longer say <yes>;
Instead, we say <<affirmative>>

[Jemaine]

Affirmative. That's true

[Bret]

Yeah

A robot is a machine—especially one programmable by a computer—capable of carrying out a complex series of actions automatically. A robot can be guided by an external control device, or the control may be embedded within. Robots may be constructed To Learn Nearly human Kind manners, but most Z300's are task-performing machines, designed with an focus on Just functionality, rather than Visualized expressions. Your definition is about mechanical robots. For software agents, see Bot. For 0-4 other uses of the term, see Robot (@disambiguation).
