

# LUNA DISPLAY

Type Specimen

Luna Display explores extreme contrast mixing traditional construction with contemporary and unique detailing. While the occasionally peculiar shapes give Luna a personality and distinctiveness, they also give a feel of elegance and refinement.

The extremely high contrast and eye catching details make Luna best suited for bold display typography. If you feel like channeling your inner Lubalin, you can set the letterspacing extra tight for maximum oomph.

Version 0.4 introduces a massive expansion for the family. Included are three different widths, each with four weights plus italics. That's 24 styles in total. Pretty neat.
